ALEXANDRE J.E. VANN

800 N. Sheppard St., #10, Richmond, VA, 23221 | (703) 674 9985 | ajevann@gmail.com

Professional Experiences:

Developer, Techport Thirteen
Richmond, Virginia, July 2015 – *present*
- In addition to previous responsibilities, tasked with application development for ServiceNow's App Store. Designed, coded, and released applications such as a change management calendar and a coding repository and editor designed for code reusability.
- Tasked with creating a simple portal to be used by Nike employees for creating and tracking incidents, connecting with IT support, and assisting customers with sales requests using mobile platforms such as iOS and Android.
- Currently creating a completely custom built, user friendly AngularJS UI for Intel users to track and manage configuration assets and servers, and providing efficient performance for a database of half a million items.

Associate Developer, Techport Thirteen
Richmond, Virginia, May 2014 – July 2015
- Acted as a ServiceNow consultant, a platform-as-a-service provider of enterprise service management software, for clients such as Nike, Intel, Intuit, and Cvent, working independently and in conjunction with team members.
- Tasked with creating dynamic and responsive applications to better visualize change management and incident reporting with heavy use of Javascript, jQuery, HTML, and CSS.

Web Content Specialist, Bon Secours Richmond Health System
Richmond, Virginia, October 2013 - February 2014
- On contract with Apex Systems to Bon Secours to assist with their intranet migration to a Microsoft Sharepoint based model. Contract was extended twice based on performance. Worked with a team to redesign and redevelop obsolete and inconsistent intranet designs for eleven Bon Secours hospitals to a newer and more coherent implementation focused on consolidating design throughout the company's separate intranets.
- Created an automated solution using Java and HTML parsing for migrating wikis, created on separate third party tools, from four separate hospitals into Sharepoint's wiki implementation. Completed the project months ahead of schedule.

Junior Software Developer, Northrop Grumman Mission Systems
Chantilly, Virginia, June 2009 – January 2010, May 2010 – May 2011
- Performed entry level duties as a junior software developer for Northrop Grumman's Business Solutions group, tasked with creating integral parts of their ePower® business workflow solution.
- Created a form submission process and user interface in C# and HTML/ASP.NET to extract details from submitted pdf files, storing and preparing the information for further processing within the workflow process.
- Tasked with trouble shooting code, preforming code corrections, and extensive testing throughout the entire code repository.

Languages and Technologies:
Proficient in: Java, C#, HTML, CSS, Javascript, jQuery
Experience with: PHP, SQL, MySQL, NodeJS, AngularJS, Python, C, Bash, ASP.NET, AJAX, XML, Matlab
OSs and IDEs: Windows, Mac OS, Eclipse IDE, NetBeans IDE, Microsoft Office, Sublime Text
